

### Thanks for buying a COTS Tree from City Market!

Here's how to make a paper snowflake for your tree:

1. Cut out square above along black dotted lines.
2. Fold square in half vertically (printed side facing out) and fold again in half horizontally.
3. Carefully cut along purple dotted lines, cutting through all layers of paper at once.
4. Unfold paper, hang on your tree, and admire your snowflake.
